SEVENTH FRAMEWORK PROGRAMME
KBBE.2013.1.4-02: Integrated Pest Management (IPM) - ERANET
Coordination and Support Action

C-IPM
Coordinated Integrated Pest Management in Europe
Grant agreement no.: 618110

PRE-ANNOUNCEMENT
TRANSNATIONAL CALL 2015

Call for applications (pre-proposals) for transnational
research in integrated pest management in Europe, launched
by C-IPM

This document is a preliminary text, therefore issues might change in the official announcement

INTRODUCTION

The present document is a pre-announcement of the joint transnational research call of the ERANET C-IPM, funded by C-IPM partners.

WHAT IS C-IPM?

Europe faces the challenge of responding to the mandatory implementation of the principles of integrated pest management (IPM) as called for by Directive 2009/128/EC on the sustainable use of pesticides. Most European countries are investing in research and extension to face this challenge, reduce reliance on pesticides, and reduce risks associated with their use. Added value and synergies can be created by coordinating such national research and extension efforts and by pooling existing resources.

C-IPM accepts IPM as a continuously improving process in which innovative solutions are integrated and locally adapted as they emerge and contribute to reducing reliance on pesticides in agricultural systems and promoting sustainable agriculture. IPM is therefore a continuum, ranging from optimisation of pesticide use within 'current' crop protection systems, to substitution via the adoption of non-chemical strategies, and to a redesign of production systems obtained by acting for example on varieties, crop rotations and landscapes.

Member States of the European Union are currently facing major difficulties in the area of crop protection in relation to the production of minor or speciality crops and more in particular with 'minor uses'. This not only relates to fruit and vegetables crops, but also to tobacco, ornamental plants, herbs and spices as well as to tropical crops grown in overseas departments. The challenge of C-IPM here is to address the reduced pesticide availability both for the long and the short term with the combination and diversification of control methods, as well as extrapolation initiatives when not already undertaken by EPPO or the European task force on minor uses.

In the future, farmers will no longer have access to the entire range of pesticides they use today, and will have to adopt IPM, incorporating alternative approaches or techniques to reduce their dependency on pesticide use. From January 2014 onwards, EU Member States are expected to implement the principles of IPM. This can only be achieved through a concerted effort to share existing knowledge and experience, as well as to develop alternative sustainable crop protection systems.

C-IPM GOALS

The overall goal of C-IPM is to ensure a higher level of implementation of IPM among European farmers by creating synergies from national investments in research and extension.

The specific goals of C-IPM are focused towards:

- Identify synergies and gaps in existing national and transnational programmes and define an IPM-specific strategic research agenda and an implementation plan.
- Organise and fund joint transnational calls.
 - Ensure better translation of national and European IPM-related programmes into applicable innovations.

BACKGROUND OF THE CALL

The ERA-Net C-IPM consists of 32 partners from 21 countries.

The first joint call for transnational research projects of C-IPM will be opened on the 27th April, 2015 (15:00h CET). This pre-announcement provides all the relevant information on the topics, projects eligibility criteria and submission procedure, timeline and contact details.

Further information about forms and guidelines, eligibility and evaluation criteria, content on topics, budget and the list of the National Contact Points (NCPs) will be published with the launch of the call, simultaneously.

Participant countries in this call are: France, Austria, Belgium (Flanders and Wallonia), Switzerland, Germany, Denmark, Estonia, Spain, Finland, Ireland, Lithuania, Netherlands, Norway, Poland and Turkey.

CALL TOPICS

This call includes the following three clusters and three topics, as following*:

CLUSTER: (A) Preventive and sustainable (pest) management

1. **Topic (A3)** “Innovative and new pest monitoring tools and Decision Support Systems” (DSS).

CLUSTER: (B) Alternative and innovative control.

2. **Topic (B2)** “Pests resistance management (the term pests includes: viruses, bacteria, phytoplasm, insects, arthropods, fungi)”.

CLUSTER: (C) IPM in Minor Crops.

3. **Topics: (C2)** “Flies in vegetables”, **(C5)** “Mites (spider, rusts and bud) in Berries and Small fruits” and **(C8)** “Soil borne pests and diseases (often polyphagous)”.

*Detailed descriptions of topics will be given in the announcement.

APPLICATION PROCEDURE

The call will be officially published on **the 27th April 2015, 15:00h CET.**

Proposals should be submitted via the Electronic Submission System (ESS), through the the special link created at the INIA’s website.

The application will follow a two steps process: pre-proposals and full proposals.

The submission of the pre-proposal is **mandatory**; it will not be possible to submit a full-proposal without having first submitted a pre-proposal.

The applications have to meet and consider the following eligibility C-IPM criteria:

- ✓ Submission of pre-proposals online through the ESS based in the Call Secretariat website: www.inia.es;
- ✓ The deadline for submission of pre-proposals is the 8th June 2015 , 15:00h CET;
- ✓ The language of the call and applications (PPs and FPs) is English;
- ✓ Project duration is maximum 3 years;
- ✓ The type of research is applied RTD ;
- ✓ The funding mechanism is Virtual Common Pot (VCP), what means that each funding body funds the selected researchers from their respective country ;
- ✓ There is non maximum limit of budget per project consortium ;
- ✓ The project consortium have to consist of researchers from **at least 3 partner countries** providing fund for the call. The **number of partners in the consortium is not restricted** ;
- ✓ Researchers from non-funding countries in the call are welcome to participate in project proposals, by their own contribution ;
- ✓ Private companies can participate in consortia depending on the national rules from their respective country where the legal entity is legally established (see National Regulations) ;

More information on national rules and regulations for participation in the call, will be provided in the announcement of the call.

TIMELINE

Important events	Date
STEP 1 (Pre-proposals)	
Pre-announcement	31 th March, 2015
Launching the call - Submission of pre-proposals (PPs)	27 th April, 2015 (15:00h CET)
Deadline for pre-proposals	8 th June, 2015 (15:00h CET)
Eligibility check	22 nd June, 2015 (15:00h CET)
CG meeting for selection of PPs	26 th June, 2015
STEP 2 (Full proposals)	
Full-proposals submission	15 th July, 2015 (15:00h CET)
Closing date for submission of full proposals (FPs)	2 nd October, 2015 (15:00h CET)
Evaluation of FPs	20 th November, 2015 (15:00h CET)
EEP meeting for evaluation	30 th November, 2015
CG meeting for selection of final projects	First week of December, 2015
Communication of final projects selected for funding	December, 2015
Initiation of funded projects	March, 2016

ELIGIBILITY AND EVALUATION PROCEDURES

A) Eligibility of pre-proposals

The eligibility of pre-proposals is made at 2 **independent and decisive levels**:

1. to meet the C-IPM requirements defined in the call (made by the Call Secretariat).
2. to meet their respective national requirements (made at National level).

The pre-proposal will be assessed against:

- Relevance of the pre-proposal to the scientific scope of this call (adjustment to one or more topics selected for funding).
- Innovative approach.
- European added value of the partnership to IPM.
- Quality of the consortium.

B) Evaluation of full proposals

The evaluation of the full proposals will be performed by the Evaluation Expert Panel (EEP), taking into account the following requirements:

- Scientific and/or technical excellence/innovation
- Potential impact (knowledge, socio-economic, stakeholders)
- Management, budget and implementation of activities (dissemination)
- Capacity building, knowledge sharing, training and mobility

CALL SECRETARIAT

Spain: National Institute for the Agricultural and Food Research and Technology (INIA)

Anabel de la Peña:

Phone: +34 91 347 87 76

e-mail: anaisabel.delapena@inia.es

List of Acronyms:

CS: Call Secretariat

NCP: National Contact Point

CG: Call Group (Funding organizations of this call)

PP: Pre- proposals

FP: Full proposals

ESS: Electronic Submission System

EEP: External Expert Panel
